Flu Shot Update

At this time, we will not be pre-booking appointments for the sole purpose of getting a flu shot. Based on direction from the Ministry of Health and due to limited quantities of flu vaccine, we will not be planning a flu clinic until early November this year. In the mean time, flu vaccine will be available at local pharmacies, including the High Dose vaccine which is available to those patients 65 years of age and older. Once more information becomes available, this message will be updated.
